

A Filtration Group Company

JFG 336-CE-MP-1

The JFG 336-CE-MP-1 elements are large diameter outside to inside flow direction gas filtration elements specifically designed for gas filtration. Through the combination of a specialized glass fiber coalescing media in a varying scale of fiber diameters, this graded density depth style design provides the optimum combination of solid contaminant holding capability and liquid particle coalescing capability.

The glass filter media is supported with a heavy-duty, spiral locked steel core. Steel end caps are then mechanically secured to the center core providing cartridge strength you can trust not to collapse or bypass when properly applied.

Performance

Standard Micron Rating	0.3μ at 98% Nominal
Recommended Change-Out DP	15 psid
Maximum Operating Temperature	275°F
Flow Direction	Outside to In
Configuration	Single Open End

Materials

Coalescing Media:	Fiber glass
Support:	Cotton
Core:	Tinned Steel
End Caps:	Tinned Steel
Gaskets:	Buna
